

# Hardness table

The left side of the table shows the reduced water hardness, derived from the mains water hardness. The right side of the table shows the expected lifespan of the cartridge, derived from the mains water hardness and the type of Quooker tank used. For continuous optimum performance replace the cartridge at the end of the lifespan.

Enter the replacement date for the cartridge in the table below. Keeping this table in a handy place will remind you to order a new cartridge on time.

	Lifespan	Installation date	Replacement date
Cartridge 1			
Cartridge 2			

\* The cartridge lifespan is based on the average consumption of Quooker water for each type of Quooker tank: PRO3-VAQ, 3 litres/day; PRO7-VAQ, 7 litres/day; COMBI, 8 litres/day; COMBI+, 7 litres/day.
